@AyazAhmad03 /Ayaz Ahmad

PROFESSIONAL SUMMARY

Final year B.Tech student with hands-on experience building Generative AI applications, RAG systems, and autonomous AI agents. Experienced in Python, machine learning, LangChain, LangGraph, NLP, and deep learning, with a focus on practical AI solutions for real-world problems.

TECHNICAL SKILLS

- **Programming Languages**: Python | C++ | C | Java | SQL
- **Machine Learning**: Data Preprocessing | EDA | ML Algorithms | Model Training and Evaluation
- **Deep Learning**: Neural Networks | CNNs | RNNs | LSTMs | Transfer Learning | TensorFlow | PyTorch
- **Generative AI**: LLMs | RAG | LangChain | LangGraph | Vector Databases | Hugging Face
- **NLP**: Text Preprocessing | Sentiment Analysis | Named Entity Recognition | Word2Vec | GloVe | Transformers
- **Web Development**: HTML | CSS | JavaScript
- **Tools & Technologies**: Git | GitHub | VS Code | Jupyter Notebook | Google Colab

EDUCATION

- **Bachelor of Technology (B.Tech) in Artificial Intelligence and Machine Learning**
  Delhi Technical Campus, Greater Noida (Affiliated to GGSIPU)
- **CGPA**: 8.6/10 as of 2026

PROJECTS

- **RABOT (Research Analyst BOT) | AI Research Assistant**
  - Developed an Agentic RAG-based research assistant for automated retrieval, analysis, and summarization of academic research papers.
  - Implemented semantic search and context-aware question answering using LangChain, FAISS vector databases, and Hugging Face LLMs.
  - *Technologies*: Python | LangChain | FAISS | Hugging Face Transformers | Streamlit | OpenAlex API | arXiv API | Semantic Scholar API | Pandas
- **MLPilot | Autonomous AI/ML Engineer Agent**
  - Developed an autonomous AI/ML agent to automate the end-to-end machine learning workflow from dataset analysis and preprocessing to model training and evaluation.
  - Implemented LangGraph-based multi-agent workflows for data preprocessing, feature engineering, train-test splitting, model selection, and evaluation.
  - *Technologies*: Python | LangGraph | LangChain | Pandas | NumPy | Scikit-learn
- **Trader Behaviour Analysis**
  - Analyzed historical trading data alongside the Fear Greed Index to study the relationship between market sentiment and trader performance.
  - Performed data cleaning, feature preparation, dataset merging, and exploratory data analysis (EDA) to evaluate PnL, buy/sell behavior, trading activity, and profitability across different market sentiments and coins.
  - Conducted correlation and distribution analysis to identify patterns in trading behavior and generate insights into sentiment-driven trading performance.

ACHIEVEMENTS

- Certified in Data Science with Python (NSDC & ITM Edu Tech Training Pvt. Ltd) – Gained hands-on experience in data analysis, visualization, and machine learning using Python libraries.
- Certified in Machine Learning and Deep Learning through the Intel® Unnati Lab Workshop on Emerging Technologies.
